The **Finishing** screen allows you to choose your machining strategy for the finishing cycle. (the options will be covered in more detail in the teaching sessions)

For best results, choose **Combination Milling** with a **Stroke Angle** of 90 degrees.

In the **Tool Paths** , select **Compute**. The toolpaths will then be generated automatically

When this process is complete, click **Simulate** to see an on screen simulation of the machining cycles (as shown below).
